### MINING, BUSINESS AND STOCKS

### N. Y. BONANZA MEETING TODAY

Financial Statement Shows the Indebtedness of Park City Company is About \$2,500.

#### REPORT OF MANAGER WILSON.

During Year 2,197 Feet of Development Work Was Performed -- Some Ore Encountered.

The annual stockholders' meeting of the New York Bonanza in being held this afternoon. . Considerable friction was anticipated, as antagonism to Manager Wilson has been manifested from time to time from Park City. Nothing of a sensational nature, however, had occurred up to 2 o'clock.

The financial statement of Secretary Barnett shows the receipts from Sept. 8, 1903, to Sept. 18, 1904, to have been as follows: From assessments, etc. \$42,151, and from the sale of ore, \$671.14.

The total disbursements during the some period aggregated \$42.744.06.melua-ing an over draft of \$526.38. The eash on hand Sept. 12 was \$77.58. The outstanding indebtedness of the

company, including the September pay rell approximates \$2,500. total development work don-

during the past year aggregated 2,179 feet. Manager Wilson, stated in his report that most of that work has been done in cross-cutting from the 400-foot level. A drift has been run in a southerly direction from the shaft, a total distance of about 714 feet, to the fourtherly side line of the contents. southerly side line of the company's property. A heavy flow of water was encountered in this drift about 600 feet south of the shaft and considerable difficulty was experienced in handling it. By the installation of pumps the water was placed under control.

The drift referred to, said Mr. Wilson in his report, was run north about 265 feet to the northerly side line of the property, thus completely and effectually cross-cutting and prospecting the entire ground from north to south between the side lines.

Work on the main east and west Naildriver vein has also been diligent-ly procesuted from this 400-foot level. if has been run about 207 feet easterly from the south level, to the east end fine of the group adjoining the Nail-driver grounds, and westerly about 761 feet. It has been necessary to tim-ber this main drift practically the en-tire distance. Some stringers of good ore were encountered, but no large bod-

In addition to the foregoing work, about 250 feet of upraising has been done on the 300 and 400 levels, and about 100 feet of winze sunk on the 400 level

Manager Wilson closed with the statement that physical conditions were never better than at present and he believes the future is bright.

#### FORENOON ON 'CHANGE.

May Day Sells Above Eight Cents-Clos ing Quotations.

The real feature of the forencom The real feature of the forencon call on the Mining Exchange was the activity displayed in and the advance recorded by May Day. The rise, according to a prominent member of the exchange, is due to no other cause than manipulation. A number have sold short and are endeavoring to cover. A few shares of Daly-West were brought out but at a reduction. Victoria sold for 1.00%, but the demand for it was limited. Sacramento strengthened a few points on the open board and was taken at 12 cents. The closing quotations and sales were posted as follows:

FIFTY MEN EMPLOYED

At the Utah-Apex Mine-Shipment of Ore Sold Today.

The Litah-Apex mine of Bingham is turnishing employment for a force of about fifty men. The bulk of this number, Manager Orem said today, is engaged in prosecuting development

Shipments are being made, however, to the valley smelters, to the extent of from 25 to 50 tons per day. The company received settlement toay for 94 tons on controls, showing thes of .26 ounces in gold, 10.6 ounce n silver, and 3 per cent copper. The ore carried an excess of iron of 26 per

ADDIE MANAGER HERE. A. F. Stevens Says Conditions Are All

Right at Idaho Property.

A. F. Stevens, manager of the Addie mine at Sliver City, Ida., is in the eity. He came in from California dur-ing the forenoon, and spent the day with local shareholders in the property over which he presides.

Mr. Stevens says great changes in the physical condition of the Addie have taken place during the past year, and that from this time on there is no doubt about the mine being able to take care of itself and make money.

The mill is running steadily and turning out yellow bars at a gratifying

NEWHOUSE RAILWAY. First of Equipment Ordered Some Time Ago Has Arrived.

The first of the equipment ordered for the little line of railway which is to be operated by the Newhouse Mines & Smelters corporation between the town of Newhouse and the mouth of the tunel through which all the ores extractd from the Cactus Copper mine will pass, has arrived.

A new Shey locomotive was forwarded south over the San Pedro road last

M'CARTY GOES EAST.

Oil Operator Will Soon Start Drills in Local Field. J. P. McCarty, the Texas oil operator the was in the city yesterday looking

after interests in the local field, depart-ed last night for Kansas City, but not until after he had left instructions with Capt. T. P. Steffey to prepare to com-mence drilling operations on the tract acquired near Farmington several months ago. Mr. McCarty expects to return to

Utah in the near future when he will go over the local fields very thoroughly. TO PRESERVE MINE TIMBERS. Demonstrations Being Made at the St

Louis Exposition.

A timber preserving plant has been erected in the MMining Gulch at the St. Louis Exposition, under the direc-tion of Dr. H. von Schrenk, of the Shaw Gardens, St. Louis. Its special work will be to test all the various methods offered for preserving railroad ties. For this purpose the Allis-Chal-mers Co. has lent free of charge, a tie-treating retort and two tanks for the preservative solutions. Practically all the methods which are now in use for preserving railroad ties and other timber from rotting when exposed to earth and weather are alike in the treatment and differ only in the pre-

servatives employed.

The ties are placed in the retort where the first operation is to dry out all of the water and sap by heat and exhaust all of this and the greater part of the air from the retort by pumps. Then while the pores of the wood are all open and practically free from va por, moisture, or air, the preservative nixture is let into the retort from the tanks. The preservatives are thus, unpores of the wood, carried into every part of the ties or timbers, no matter how thick or long they may be. .

The great need of finding some pro-cess for making timber for railroad ties last in the ground beyond its natural life comes from the practical ex-haustion of the country of its supplies f such good timbers as white oak for this use. Railroads must today use for ties, and much of this is of a very inferior quality. In order to protect these poorer classes of ties from early decay many methods of preservative reatment have been devised and alnost every one has shown good results nder certain conditions. At the plant ow established in the Gulch it is in-ended to treat various lots of ties by various processes. Each batch of ties will then be put into regular service in some railroad track and a record kept each tie until it is retted or worn t. As those tests and records will be

official, they will of necessity carry great weight with them. The results obtained from the tests upon railroad ties, will also be useful to mining men on account of their in-

irect bearing upon mine timbers. It is to be hoped, however, that those charge of the testing plant may conclude to take up the subject of mine timbering, for this field is second only to the preservation of railroad ties, if indeed it occupies a second place.-Mines and Minerals for September.

NEW COMPANY FORMED.

Local Mining Men Form the Salt Lake Route Exploration.

The Salt Lake Route Exploration ompany is the name of a new corporation about to be launched in this city and which has for its purpose the evelopment of mining property along the new railroad to Los Angeles, The incorporators are H. S. Joseph, R. Nicol, Joseph Oberndorfer, Julius uer, Harvey Hardy and Thomas einnogle. The first three named are president, vice president and secretary and treasurer, respectively.

Mentioned as the basis for the incorporation are six mining claims located in the Good Springs, Nevada, mining

### SHAREHOLDERS ARE IN SESSION

Montana-Tonopah Meeting Called To Order and an Adjournment Taken.

IT IS WELL ATTENDED.

Don Gillis Comes Down from Butte-Officers Will Make a Full and Complete Statement.

The annual meeting of the Montana-Tonopah Mining company was called to order by President Knox promptly at 10 o'clock this forenoon in the offices of Dickson, Ellis & Ellis in the Progress block. The rooms were well filled with shareholders in the big Tonopah mine among whom were a number of officers of the company. Don Gillis of Butte, representing the Morris interests in the corporation, was present.

It being evident that a great many proxies would be voted a motion was made and carried for the appointment of a committee on credentials and President Knox named Secy, R. P. Dunlop, J. B. Thompson and A. C. Ellis, Jr., as members of the committee and an adjournment was taken until this afternoon at 2 o'clock.

The meeting was still on at press time and will probably last till late in the afternoon.

A financial statement, also a report covering the operations of the company for the past year will be read to the sembled stockholders.
It is not believed the opposition to

the present management will develop a great amount of strength inasmuch as a large majority of the stock is in the hands of a few who are entirely in harmony with the present regime.

WOOD RIVER MINES.

Red Elephant Mine is Shipping-Other Mining Notes.

P. M. Bruner is in the city from Halley. He has not been here for two years and was surprised to see how the city has grown since his last visit, says the Boise Statesman

In speaking of the Wood River section, Mr. Bruner says it is very prosperous. All business is good, the mining industry being in better shape than since the days of the boom. In the opinion of Mr. Bruner the Croesus mine is the best in the state. He says the ore bodies on the 500, 600, 700 and 800 levels are chormous. On one of the levels considerable drifting has been done and it shows the ore shoot to be phenomenal. The second vein, opened in cross-cutting from the shaft, adds en to the value of the

Mr. Bruner reports that the Red Ele-bhant is now shipping. When the first ad appeared in Hailey, it was renarked that it was the first shipment from the property for 10 years. Re-cently the veln in the Calegonia, one of the Red Elephant group was opened. The mines on Warm Springs creek near Ketchum are all looking very well both the zine and the lead properties Work is being prosecuted in the Elk-horn, the great property east of Ketch-

um that produced so heavily in the early days of the camp. The vein has not yet been found, but the manage-ment intends to carry the development forward until the lost ledge shall have been located.

PETRO MEETING CALLED. Stockholders Face the Future With an Empty Treasury.

A meeting of the stockholders of the Petro Mining company of Bingham has been called for Oct. 7, at which time the future of the company will be discussed. Some stockholders have com-plained of the inactivity which has prerafled for some time past, and believe it is high time that something is do ing. But the treasury of the corpora tion is empty and an assessment will probably be in order.

TETRO'S FINE SHOWING. Tintic Company Shipped Over \$60,000

Worth of Ore This Year. The management of the Tetro mine made a splendid exhibit at the annual

meeting of that company, which was held this afternoon and which was the first one held since September, 1898. Since that time, assessments were eyled and collected to the amount of \$70,261.17; the receipts from other cources being enumerated, as follows: Ore shipments, \$63,551.80; interest, 278,46. At the beginning of the year, 1898, the treasury contained a balance on hand of \$158.31, as against \$27,802.23 at the present time. The total disbursements during the period mentioned amounted to \$107,875.60, including the \$9,000 dividi among the shareholders in divi-

It is a noteworthy fact that the Tetro has been on the regular shipping list scarcely over a year. The ores market-ed averaged about \$20 a ton. Manager James A. Pollock made a verbal statement to the stockholders bearing on physical conditions at the

mine, which were pronounced as being first-class.

#### CONCENTRATES.

Frank Morehouse is still in Mexico on mining business,

A good strike of ore is reported from the Whirlwind mine in American Fork

James A. Cunningham and son Almy, and Bishop W. W. Cluff departed last night for Mexico Manager Henry M. Crowther of the

Continental-Alta mine returned from Alta last evening. J. E. Hill, Jr., manager of the Pittsburg-Alta mine, visited that Alta property last night.

At the Ohio Copper mill at Bingham the new tables recently installed are giving good satisfaction. The new \$200,000 smelter at Sumpter,

was blown in for continuous operation one day last week.

The Salmon group of claims in the Greenhorn mountains, Ore., has been sold to an Ohio syndicate. The new smelter at Landore, Ida.,

The new smelter at Landore, Ida., will be blown in during the week, according to Welser advices.

pany, has returned from a trip to Alta. Supt. George H. Badgett of the Montana-Tonopah mine, is in the city in at-tendance at the stockholders' meeting.

J. E. Bamberger, president of the Daly-West Mining company, has re-turned from a trip to the Pacific coast. Manager Otto Stahlman of the Glasgow & Western Exploration company is expected to return from California

Broker J. M. Reynolds has returned from New York, where he went in the interest of the Wasatch King property in Beaver county, Charles Tibbetts, manager of the

Pfau gold mine near Jerome, Arizona, is in the city the guest of his father, Capt. A. O. Tibbetts, The ore and bullion settlements re-

ported late yesterday were, as follows: Crude ore and concentrates, \$29,690; base bullion, \$24,700. George A. Bartlett, attorney for the Montana-Tenopah Mining company, has arrived from the west to be present at today's meeting.

The remains of Edward Blake, the old time Park City miner who died in this city last Sunday, were shipped to San Francisco today for burial. T. W. Farnham, treasurer of the

Utah and Eastern Copper company, has arrived from the east. He was met here by Manager C. H. Doolittle. The shaft at the Grand Central mine in Tintic is nearing the 1,200 foot point and is to be continued to the 1,350 level. A drift will be started from the 1,200.

E. H. Dewey, the well known Idaho mining and caliroad operator, who makes his headquarters at Nampa is in the city, and visited the mining exchange during the forenoon.

A dispatch from Mexico city states that two wealthy business men of that place have entered into an agreement with the United Mining and Development company, to develop a valuable group of silver, lead and copper claims. M. S. Browning of Ogden is a arge shareholder in the latter, The directors of the Lower Mam-

moth Mining company met yesterday afternoon and again called upon the shareholders to contribute to the extent of 5 cents a share, the proceeds from which is to be applied in the further development of the property. The total assessment aggregates \$7,500, C. M. De Camp has returned from

C. M. De Camp has returned from Atlanta, where he went with W. C. Mc-Elheny to look at the Minerva mine, in which Mh. McElheny is interested. He found the property looking well. It shows a streak of ruby silver ore that is very rich, and much of the ore of the mine carles good values in gold. Mr. De Camp formed a very favorable impression of the Atlanta district and ooks for it to became a steady and

### MARKET UNEVEN AND UNCERTAIN

Mixed Gains and Losses Characterized Dealings at the Opening.

### PRICES THEN TENDED UPWARD.

Smelting Taken Freely on Decline-Many Stocks Reacted to Below Yesterday's Close.

New York, Sept. 13.-Mixed gains and losses which were limited to small fractions were shown by the opening prices in the stock market today. Gains preiominated but some of the most prominent stocks were lower, including South-

nent stocks were lower, including Southern rallway, which showed the effects of realizing on yesterday's advance. American Smeiting ran off 14. The market was active and broad.

Prices tended upward all around after the opening. The coalers, local tractions, Amaigamated Copper and United States Steel preferred were conspicuously firm. Smeiting was taken freely on its decline and more than recovered its loss. Consolidated Gas and Metropolitan Securities rose 1 and fierce attacks on St. Paul caused renewed selling of all the grain carriers and the general market declined easily.

riers and the general market declined easily.

St. Paul, Southern Pacific, Texas & Pacific and Reading declined at 191% and Metropolitan Securities reacted to 2% below yesterday's final figures.

Reading and Texas Pacific made effective recoveries and checked the general decline which had run to a point. Metropolitan Securities railied 2 and Metropolitan Railway rose 1% over yesterday. The response in the general list was moderate until Pennsylvania moved up a point, when prices rose more vigorously.

Bonds were easy at noon.

Speculation became hesitating at 12 o'clock and the general railroad list did not sympathize much with the heavy buying of Southern railway, which carried it to 34%. Ontario & Western made a belated rise of a point, and there was a very heavy absorption of American Locometive which advanced 2% to 27%. Railroads moved sluggishly and renewed weakness in St. Paul and Union Pacific, which forced them to the lowest, carried the entire market off again at 1 o'clock.
